

Storage Facility: Case Study #128

The Challenge:

When Valley River Storage came to Net Visibility Group they had several concerns and very specific needs.

- Needed to increase occupancy rate that was hovering around 65%
- Decrease their ever increasing Yellow Page advertising budget.
- The local storage environment was very competitive and the advertising methods that they had relied on for years no longer seemed to be generating the same results.
- Customers searching for them weren't able to find them even when searching for their Company Name.
- They needed a brand new website with a new domain; this would have to compete with the competitors that had long established web presence and large internet advertising budgets.

The Plan:

- Find a search relevant domain.
- Design and build a website that was SEO friendly, including URL structure, meta-data, sitemaps and keyword density.
- Undertake keyword research and analysis to identify the top keyword in relation to their industry and geographic location.
- Develop and implement an aggressive link building strategy based on keywords targeted to reach the client's ideal customer.
- Claim and optimize Local business listings in Google, Yahoo and Bing
- Frequent and proactive optimization monitoring.

The Results:

The results were better than the client's wildest expectations; the campaign brought considerable improvement in search engine rankings and overall internet presence.

- Overall occupancy rate increased to over 90%
- Decreased overall advertising budget by 80% including yellow pages budget to almost nothing.
- Achieved # 1 position in Google for 70 different keyword phrases and over 170 for Google, Bing and Yahoo combined.
- 1250% (+) ROI (*measured by new revenue on increase occupancy/Internet marketing budget*)
- Over 3000 Visitors to website annually (and increasing) 83% (+) have been new visitors to the website.
